Subject: [lrra-repeater] Fresh Roster on LRRRA Web Site

Hi, Folks,

I've updated the roster on our www.qsl.net/lrra website so it now contains all the paid-up and good-standing members. You may want to check it out to make sure it's accurate.

I haven't been over there to inspect things lately, but when I was working with the site today I noticed that loading pages was extremely slow. I have a timer on my web design system and it tells me approximately how much time a particular page will take to load on an ordinary machine. The longest is the roster page at 22 seconds.

The roster when I went back to check things out today took over four minutes! This means our connection from WorldPath is really slow.

Anybody else notice the website dragging lately?

73, dikj1o
