

The Lakes Region Repeater Ass'n., Inc.

1981-1982 News Letter

This past year has been one of many changes and improvements for our organization. Our new machine has been installed and is working well. The corporation papers have been changed to show our new location and trustees and have been rerecorded with the State of New Hampshire. The 450 control links have been reworked and are in the process of being installed. All in all, it has been a busy and expensive year for our group.

Our Spring gathering held at Pheasant Ridge Country Club was a success but the attendance was slightly down due to the conflict with other activities taking place on the same date. This coming year we will be sure to pick a date without conflict so that we can have a good turn out.

At our annual business meeting, also held this year at the Pheasant Ridge Country Club, it was voted to buy a Bird Watt Meter for our Technical Committee to use in maintaining our equipment. This has been done and is currently being used to monitor our signal. It was decided at our meeting to delay any decision for a year concerning the installation of telephone facilities into our building. Our best estimate is that this service would cost an additional ten dollars per year in dues. Please be considering this commitment to public service; we feel it would upgrade our whole operation and our image in the community.

We have enclosed a list of names and addresses of paid members for your use. If you have met anybody on the repeater whose name is not on the list, please let us know. Our list has been shrinking. If you know of others that would like to join our organization, please have them contact us.
